Banaras Hindu University, Varanasi

Academic Year 2024-2026

Department of Computer Science

Assignment 5 - (Image Processing)

CS-341P

Name : Anish Pal

Course : M.C.A

Roll no : 24419MCA058

Subject : Image Processing

Date : 23-04-2025

Submitted to : Dr. Ankita Vaish

Assignment

1. Perform histogram matching by taking two images.

2. Write a program to perform smoothing on an image with averaging filters of size 3, 5, 9, 15 and 35. Show results in a subplot.

3. Write a program to perform filtering in spatial domain using a median, max and min filters of size 3 * 3, 5*5, 11*11. Show results in a subplot.

4. Write a program for finding edges in an image using Gradient mask, Cross-gradient mask of size 2*2. Obtain sharpen image also.

5. Write a program for finding edges in an image using Sobel filter.

6. Write a program to perform following operations for sharpening an image:

a. Take an image (attached)
b. Apply Laplacian filter
c. Obtain sharpen image by adding 'a' and 'b'

7. Write a program for sharpening an image using unsharp masking.
